## Education

|                                                                |          |
|----------------------------------------------------------------|----------|
| MCA, Vivekananda Institute of Professional Studies (2022-2024) | 8.8 CGPA |
| BCA, Jagannath International Management School (2019-2022)     | 9.0 CGPA |

## Skills

C#, .NET 8+, Blazor, GraphQL (HotChocolate), RESTful APIs, Next.js, JavaScript, SQL Server, Entity Framework Core, LINQ, Azure, Tailwind CSS, HTML/CSS, Git/GitHub, MVC, CI/CD, Clean Architecture, Agile/Scrum, Azure DevOps, Unit Testing (xUnit, NUnit), Code Reviews, Query Optimization

## Work Experience

*Symbiotic Consulting Group*

### Software Developer Intern (Dec 2023 – May 2024)

- Developed and maintained web applications using **C#, .NET, and Entity Framework Core**, applying **Clean Architecture** principles to improve scalability and code maintainability.
- Assisted in the early development phase of the **Service Opportunities project** at VITAS Healthcare, focusing on foundational backend components and API integrations later expanded in the full-time role.
- Contributed to full-stack development using **JavaScript, CSS, and Blazor**, enhancing **UI responsiveness** and improving overall **user experience**.

### Software Developer (May 2024 – Present)

- Lead developer for backend components of the **Service Opportunities** system, building **RESTful APIs**, optimizing SQL/EF Core operations, and improving data-processing efficiency by **30%** within a Clean Architecture framework.
- Enhanced the EMR platform by implementing care-plan conflict resolution logic and offline-first Blazor functionality, leveraging **local storage** and **in-memory cached objects** to improve performance and state reliability. These optimizations reduced clinician sync failures by 25% and significantly improved usability in low-connectivity environments. Modernizing the organization's
- GraphQL stack by upgrading to **.NET 10** and **HotChocolate 16**, targeting **40% faster** query execution and improved schema maintainability.
- Developed a production-grade **code generation platform** that automates the creation of **data models, DbContexts, GraphQL types, and WebAPI layers**, with support for **HotChocolate v13+**; implemented both backend processing and the **Blazor frontend** for configuration and execution workflows.
- Work closely with cross-functional teams in an **Agile** environment, ensuring high-quality delivery through **unit testing, peer code reviews, and CI/CD pipelines** in Azure DevOps.

## Certifications

- Microsoft Azure Fundamentals: AZ-900
